

Little Brown Bat - 30-Second – Captioned for the Visually Impaired

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

Little brown bats may be small, but they have the largest distribution of all bat species in Canada.

[Bats eating]

Their big appetite plays a role in insect suppression, helping us reduce pesticide use.

[Bats eating]

Insects give bats fat reserves, preparing them for the winter.

[Bats flying in a cavern]

Sadly, a fungal disease called White Nose Syndrome is causing the death of thousands of Canadian bats, including the little brown bat during hibernation. The species may not be able to survive without our help
