

Narwhal - 30-Second – Captioned for the Visually Impaired

MUSIC: "HINTERLAND WHO'S WHO" THEME

ANNOUNCER (V.O.):

The Arctic waters of Northern Canada are home to the mysterious narwhal.

[Narwhal coming out of the water]

Narwhals can hold their breath for up to 20 minutes and dive over a kilometre deep while feeding on fish and squid.

[Aerial view of narwhals]

Their tusk is an ivory tooth that grows up to three metres on males.

[Image of the narwhal's ivory tooth]

Narwhals sometimes travel in groups of several hundred, though small pods are more common.
